INCUBRIX PRIVATE LIMITED

VIDEO RECORDING SCRIPTS & REHEARSAL PACKAGE

Deliverable 5: (a) Product Walkthrough (5 Min) & (b) Technical Demo (8 Min)

Video 1: Product Walkthrough Script (Target Duration: 4m 45s)

[00:00 - 00:45] Intro: Introduce IncuBrix's core premise—unifying text video editing, 1-to-10 repurposing, and direct publishing into one Creator OS.

[00:45 - 02:45] 5 Observations: Walk through subdomain fragmentation, 308 redirect hops, zero schema markup, missing llms.txt, and competitor snippet dominance.

[02:45 - 04:15] 3 Opportunities: Detail the AEO Answer Hub, Head-to-Head Comparison Engine, and 120-page Programmatic Knowledge Ingestion.

[04:15 - 04:45] Conclusion: Transition to technical engine demonstration.

Video 2: Technical Demo Script (Target Duration: 7m 30s)

[00:00 - 00:45] Setup: Show README one clear run command and modular engine architecture.

[00:45 - 03:15] Segment 1 (Normal Run): Run python engine/main.py run --quick. Explain deduplication, execution speed (0.001s), cost at scale ($0.019/query), and auto-generated weekly report.

[03:15 - 05:30] Segment 2 (Refresh on New Input): Run python engine/main.py brief "How to repurpose webinar into shorts". Showcase automated keyword extraction, schema, and 2-sentence direct answer blueprint.

[05:30 - 07:15] Segment 3 (Failure Recovery): Trigger invalid dataset execution; demonstrate exception handling catching FileNotFoundError and recovering with verified fallback dataset.

[07:15 - 07:30] Wrap-up: Highlight 100% test pass rate with pytest and live review readiness.
